

## Camp Topic: Robotics and the Internet of Things (IoT) Technology Challenge using the Sphero RVR and Comparative Anatomy

All students will participate in the technology challenge. Through the challenge, students will engage in solving real-world problems, utilizing the engineering design process, coding and integrating software and hardware, through team-based organizational structures and roles to achieve the goals of the challenge using the Sphero RVR. In addition, students will learn about comparative anatomy through animal dissections.

If you have any questions, please contact the MSEN staff by email at [ncsumsenpcp@ncsu.edu](mailto:ncsumsenpcp@ncsu.edu) or by telephone at 919-513-8533.
